*I apply natural language processing and statistical models to understand social phenomena in online social networks, such as adoption of innovations and political discourse.*

## Education

- 2015–present **Georgia Institute of Technology**, *Ph.D. in Human-Centered Computing*.  
Specialization in social computing.  
Research interests: natural language processing, sociolinguistics, computational social science.  
Advised by Jacob Eisenstein.
- 2010–2014 **Dartmouth College**, *A.B. Linguistics (cum laude), minor in Computer Science*.  
GPA: 3.78 (cum.) 3.90 (major)  
Thesis: "African American English syntax in Twitter."  
Advised by James Stanford and Sravana Reddy.

## Awards

- March 2017 **Honorable Mention**, NATIONAL SCIENCE FOUNDATION GRADUATE RESEARCH FELLOWSHIP.  
Runner-up in annual Graduate Research Fellowship competition. Award includes increased access to supercomputing resources.
- August 2016 **Tuition Reimbursement Award**, PACIFIC NORTHWEST NATIONAL LABORATORY.  
Awarded to PhD interns in the National Security Internship Program who demonstrated outstanding performance in their summer research project. Covers one semester of graduate school tuition.
- August 2015 **Great Promise Award**, CHARLES RIVER ANALYTICS.  
Awarded to an intern in each company division who shows significant promise as a software engineer.
- May 2014 **Academic Achievement Award**, DARTMOUTH COLLEGE LINGUISTICS DEPARTMENT.  
Awarded to a graduating student who has demonstrated considerable commitment to research in linguistics.

## Skills

- Programming languages Java (proficient), Python (proficient), R (intermediate),  $\text{\LaTeX}$ (intermediate), Javascript/d3 (beginner)
- Programming libraries sklearn, statsmodels, pytorch, gensim, nltk, Beautiful Soup, matplotlib, pandas
- Natural languages English (native), French (fluent), Japanese (beginner), Spanish (beginner), Māori (beginner)

## Research

- Aug 2015 – present **Graduate Research Assistant**, GEORGIA TECH COMPUTATIONAL LINGUISTICS LAB.
- Developing methods to describe and predict language change online.
  - Studying applications of language change analysis to real-life situations.
  - Adapting statistical models such as causal inference and survival analysis to computational social science.

- Dec 2013 – **Undergraduate Research Assistant**, DARTMOUTH COLLEGE LINGUISTICS DEPARTMENT.  
June 2014
- Designed regular expressions to extract non-standard sentence patterns (syntax) characteristic of African American English (AAE) in Twitter data.
  - Determined correlation between AAE and community-level demographics: e.g. lower percentage AAE in communities with higher median age.
  - Provided sociolinguistic evidence for diversity among AAE speakers.

## Work

- May 2018 – **PhD Fellow**, Max Planck Institute for Demographic Research.  
Aug 2018
- Leveraged Facebook advertising API information to assess immigrant assimilation in the US.
  - Collected, organized and analyzed large-scale data with statistical models to test hypotheses on immigrant assimilation.
  - Engaged with interdisciplinary research team to set up survey for follow-up analysis.
- May 2016 – **PhD Intern**, Pacific Northwest National Laboratory.  
Aug 2016
- PhD intern through the National Security Internship Program.
  - Formulated and tested methods to predict word dynamics over time in social media data.
  - Implemented unsupervised clustering and smoothing in Python (sklearn) to group semantically related words.
  - Corroborated connection between distributional semantic meaning (measured with word vectors) and frequency dynamics.
- Aug 2015 – **Graduate Teaching Assistant**, Georgia Tech.  
Dec 2015
- Designed homework assignments that required implementation of AI algorithms in iPython notebooks.
  - Developed grading scripts for automated assignment scoring.
  - Prepared documentation for assignments and material to help transition the class to an online platform.
- June 2014 – **Software Engineer Intern**, Charles River Analytics.  
Aug 2015
- Contributed to agent-based social network generation model (in AnyLogic and Java MASON), in collaboration with two scientists.
  - Designed pipeline for social network synthesis and analysis, implementing metrics such as the network clustering coefficient and community modularity.
  - Extracted parameters from large-scale social media data for network generation model, such as distribution of languages across Twitter users.

## Graduate Coursework

- |                                |                                  |
|--------------------------------|----------------------------------|
| - Social Computing             | - Natural Language Understanding |
| - Design of Online Communities | - Statistical Methods            |
| - Information Visualization    | - Time Series Analysis           |

## Presentations and posters

- 2019 I. Stewart, R. Flores, T. Riffe, I. Weber, E. Zagheni. Rock, rap, or reggaeton? Assessing Mexican immigrants' cultural assimilation using Facebook data. WebConf 2019. San Francisco, CA.
- 2018 I. Stewart, J. Eisenstein. Making "fetch" happen: the influence of social and linguistic context on nonstandard word growth and decline. EMNLP 2018. Brussels, Belgium.
- 2018 I. Stewart, Y. Pinter, J. Eisenstein. Si o no, que penses? Catalanian independence and linguistic identity on social media. NAACL 2018. New Orleans, LA.
- 2017 I. Stewart, S. Chancellor, M. De Choudhury, J. Eisenstein. #anorexia, #anarexia, #anarexyia: Characterizing Online Community Practices with Orthographic Variation. IEEE Big Data, SocialNLP Workshop 2017. Boston, MA.
- 2017 I. Stewart, J. Eisenstein. Social and Distributional Predictors of the Success of Lexical Innovations in Online Writing. New Ways of Analyzing Variation (NWAV). Madison, WI.
- 2017 F. Hohman, S. Soni, I. Stewart, J. Stasko. A Viz of Ice and Fire: Exploring Entertainment Video Using Color and Dialogue. Workshop on Visualization for the Digital Humanities. Phoenix, AZ.

- 2017 I. Stewart, D. Arendt, E. Bell, S. Volkova. Measuring, Predicting and Visualizing Short-Term Change in Word Representation and Usage in VKontakte Social Network. International Conference on Web and Social Media (ICWSM). Montreal, Canada.
- 2017 I. Stewart, J. Eisenstein. #thighgap to #thyghgapp: Incrementation of Orthographic Variation on Instagram. Diversity and Variation in Language Conference (DiVar1). Atlanta, GA.
- 2015 E. Stickgold, B. Skarin, I. Stewart, C. Lofdahl. Extending generative models of large scale networks. 24th Conference on Behavior Representation in Modeling and Simulation (BRiMS). Washington, D.C.
- 2015 I. Stewart. We some young kings: Communities, age, and African American English online. 2015 Annual Meeting of the American Dialect Society. Portland, Oregon.
- 2014 I. Stewart. Now we stronger than ever: African American syntax on Twitter. EACL 2014. Gothenburg, Sweden.

### Invited Talks

- 2018 Language and computers...and society! Guest lecture for LING 3813 at Georgia Tech.
- 2018 Is it social or linguistic? Examining internal factors in language change. Workshop on New Methods in Computational Sociolinguistics. Leiden, Netherlands.

### Reviewing

- 2019 ICWSM, NAACL, ACL.
- 2018 ICWSM, NAACL, EMNLP, W-NUT.
- 2017 ICWSM, EMNLP, CONLL.
- 2016 EMNLP.

### Service

- 2018-2019 Co-Chair of Graduate Student Council Travel Fund Committee.
- 2018 Reviewer for President's Undergraduate Research Awards (PURA) applicants.

### Mentoring

- 2018 Xiaochuang Han (undergraduate): Deep Learning for Geographic Language Modeling.

### Interests

- |                     |                  |
|---------------------|------------------|
| - Music making      | - Cookie baking  |
| - Language learning | - Letter kerning |
